

1  
2 **ABSTRACT**

3 An implementation is described herein that generally pertains to digital  
4 video television technology. At least one implementation, described herein,  
5 provides an asset definition framework for digital television (DTV) managed  
6 applications. This abstract itself is not intended to limit the scope of this patent.  
7 The scope of the present invention is pointed out in the appending claims.
